

WALLET CONNECTION GUIDE-Desktop

Metamask Setup for Desktop users

Heperum Wallet setup:

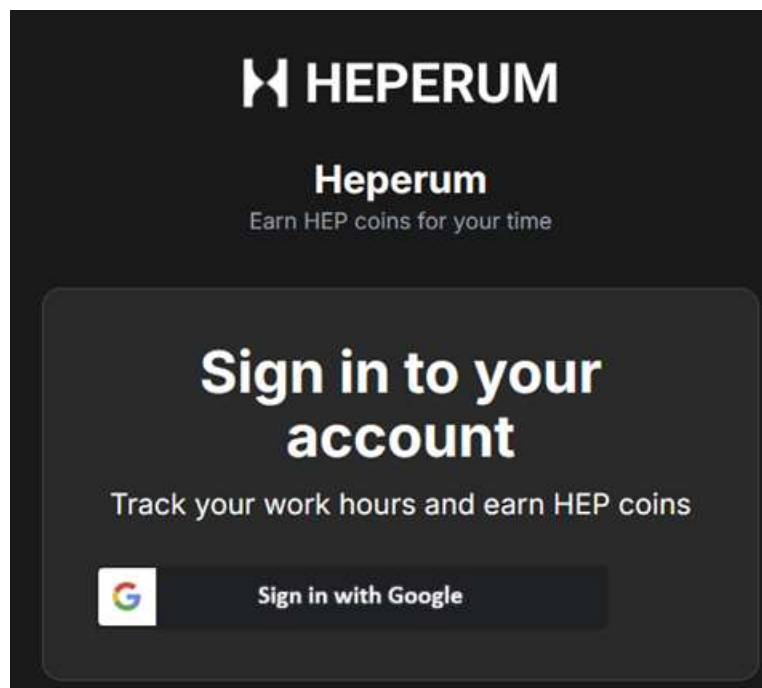

This guide helps users:

1. Add the **Heperum Mainnet** network
2. Add the **HEP token**
3. **Link your Wallet in Heperum Time Log Interface**
4. Verify everything is working

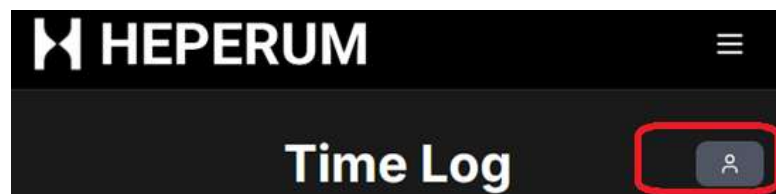

Install or Open Brave Wallet or MetaMask wallet (desktop users).

Steps to add Heperum Mainnet and HEP Token to your Wallet.

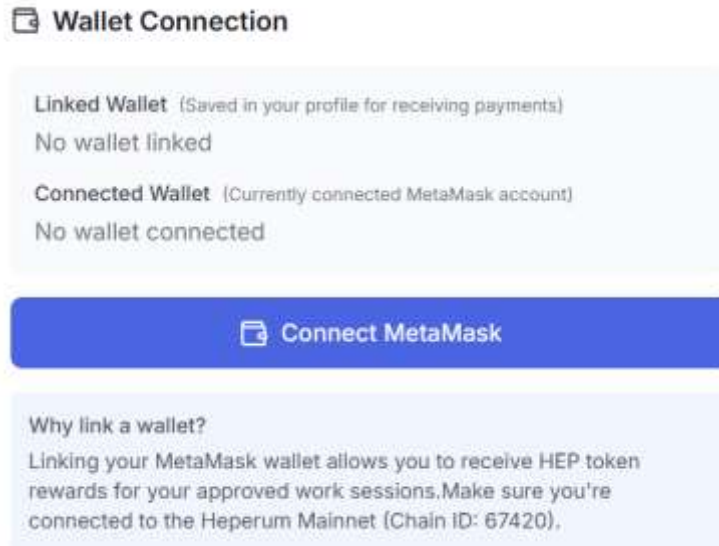

1. Open Metamask Wallet using desktop version or Brave Wallet.
2. Login Heperum Time Log web interface: <https://timelog.heperum.org/> with your Google account.

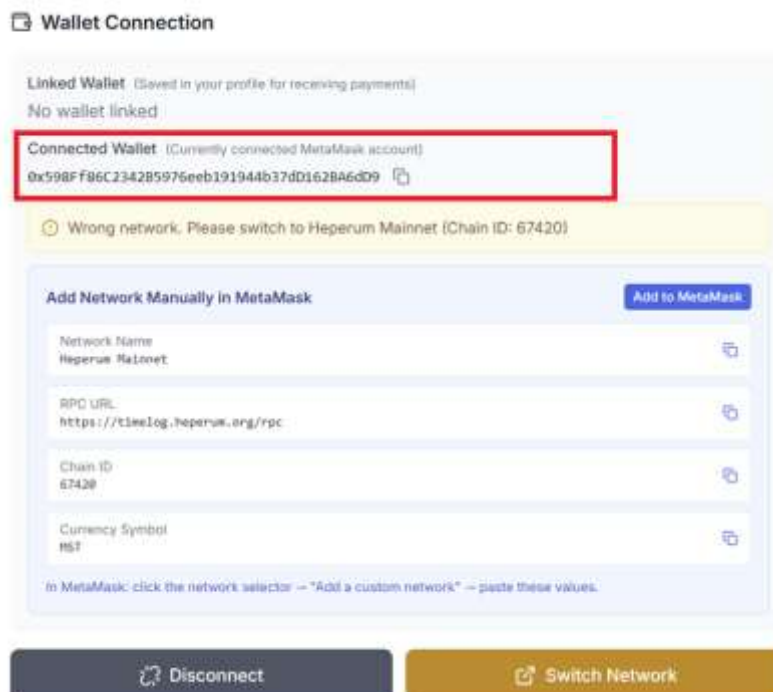

3. Select your Profile:

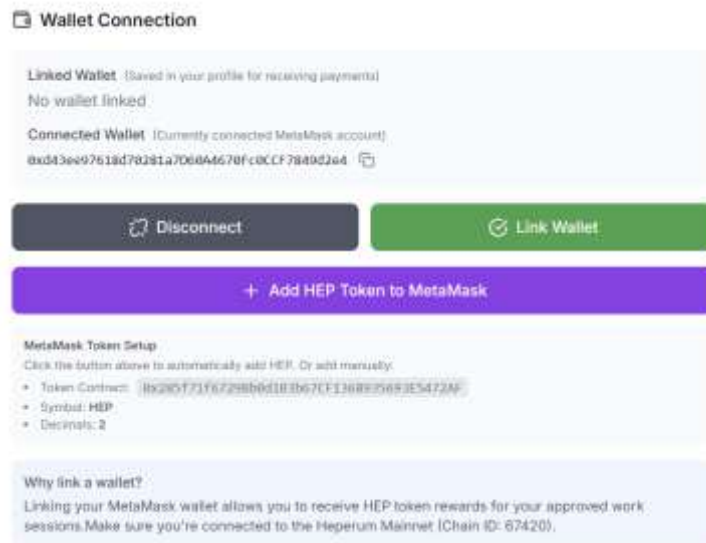

4. Go to Wallet Connection section and select **Connect MetaMask** and select **Connect**. Afterwards switch to Wallet (MetaMask/Brave Wallet) section and **confirm Connect** (to Heperum network).

5. You should now be able to see Connected Wallet's Address and a message that we still need need to switch to Heperum Network. Now **select Switch Network** and again switch to **Wallet** and **confirm Connect**.

6. Select **Link Wallet** to save the wallet address for receiving payments.

7. Now select **Add HEP Token to Wallet (MetaMask/Brave)**. Next switch to Wallet and **Confirm Add Token**.
HEP token is now visible in your Wallet and in Heperum Wallet Connection section you should now see Linked and Connected Wallet and also the HEP token Balance of the Linked Wallet.
