

WALLET CONNECTION GUIDE

Metamask on Mobile Setup

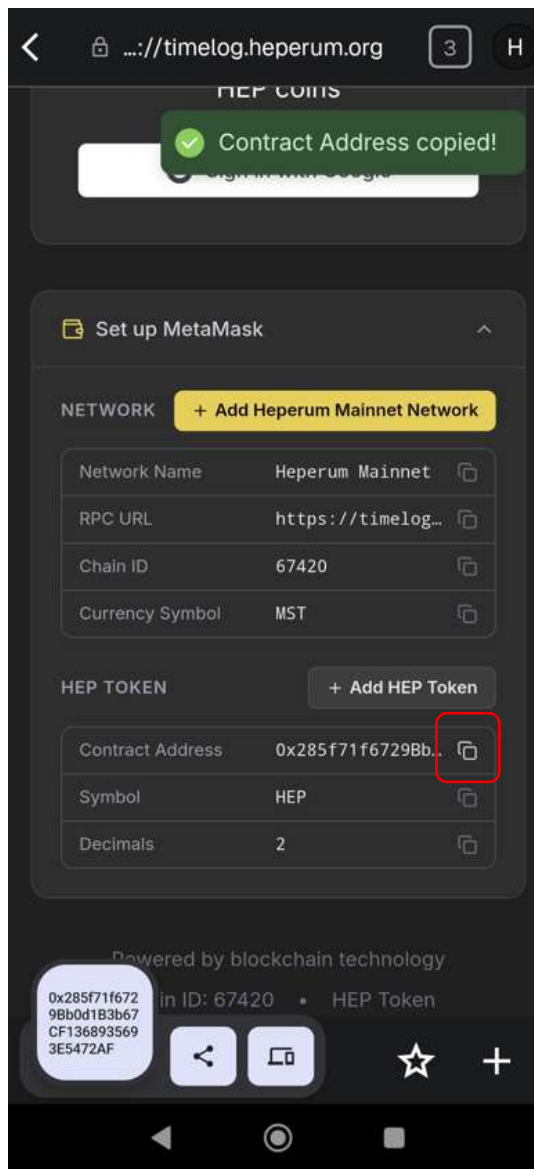

Setting up Heperum Mainnet Network

1. Open **Metamask**
2. Go to **Explore** (2nd icon bottom left, next to Home)
3. Input <https://timelog.heperum.org/>
4. **Do not Login!** Select **Set up MetaMask**. Select **AddHeperum Mainnet Network**

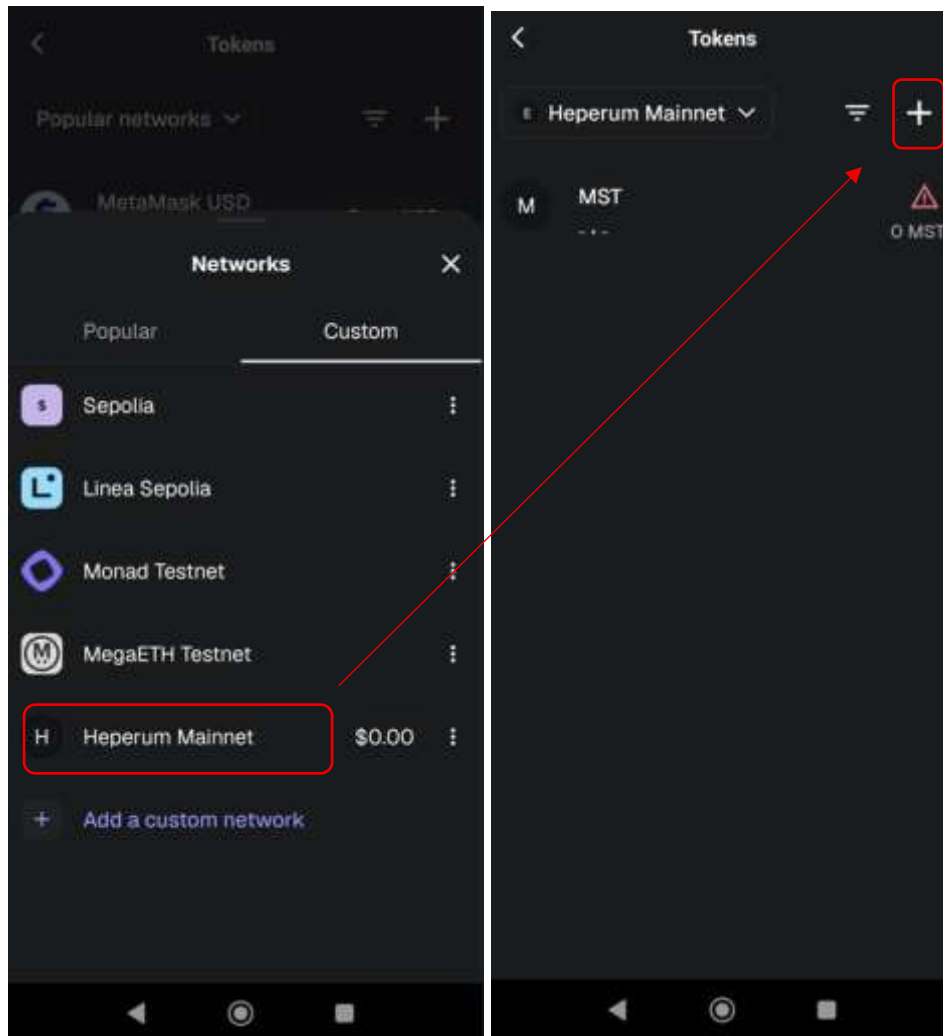

Setting up HEP Token (manually)

5. **Copy** HEP TOKEN Contract address

6. In MetaMask go to Tokens. You currently see Popular Networks, switch to Custom Networks. Select Heperum Mainnet. Select plus icon (+) in top right corner. Copy the HEP contract address. Select Next and then select Import.

7. **Paste** HEP Token address (below) in the Token contract address and select Next:
Or **copy/paste** HEP Token Contract address provided here:
[0x285f71f6729Bb0d1B3b67CF1368935693E5472AF](#)

The image displays two sequential screenshots of a mobile application's 'Import tokens' interface.

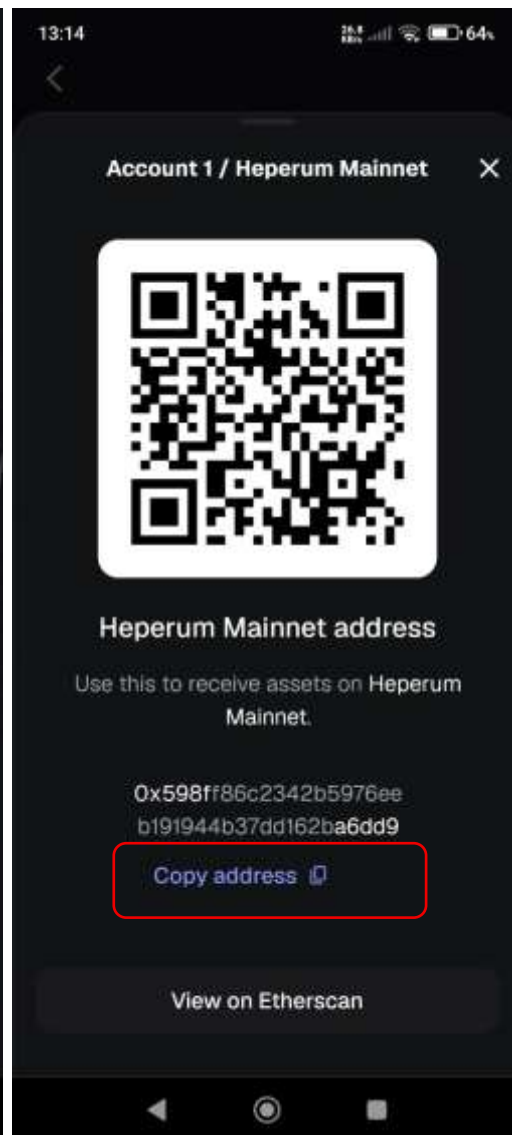

Left Screenshot: The screen is titled 'Import tokens'. It asks 'Would you like to import this token?' and shows a token card for 'Heperum' (HEP) with a circular icon containing the letter 'H'. At the bottom, there are two buttons: 'Cancel' and 'Import'. The 'Import' button is highlighted with a red rectangular box.

Right Screenshot: The screen is also titled 'Import tokens' but is in the 'Custom token' section. It displays a warning message: 'Token detection is not available on this network yet. Please import token manually and make sure you trust it. Learn about token scams and security risks.' Below this, there are three input fields: 'Token contract address' (containing '0x285f71f6729Bb0d1B3b67CF1368935693E5472AF'), 'Token symbol' (containing 'HEP'), and 'Token decimal' (containing '2'). At the bottom, there is a 'Next' button, which is highlighted with a red rectangular box. A red arrow points from the 'Next' button in this screenshot to the 'Import' button in the left screenshot.

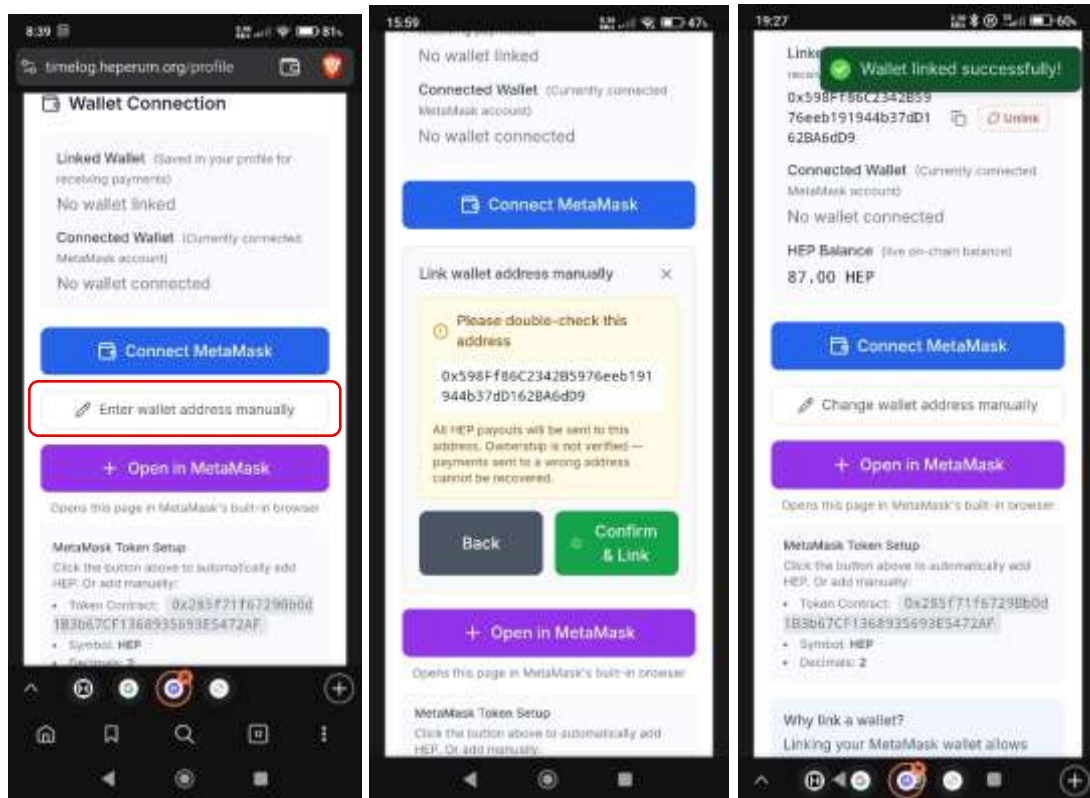

8. Manually connect your Wallet Address to Heperum Time Log

In **MetaMask** go to **Tokens**.

You currently see Popular Networks, switch to **Custom Networks**. Select **Heperum Mainnet** and **select (Heperum) HEP token**. Below select **Receive** and select **Copy address**.

9. In Heperum Time Logo go to Profile -> Wallet Connection section. Select **Enter Wallet address manually**. Paste the address from Metamask, select **Continue**. **Recheck the address** then select **Confirm & Link**.

10. You should now be able to receive your Heperum tokens to your wallet. We suggest for the first payout request to select the minimum amount of 8 hours and check if the wallet address and setup is OK.
